Re: Ashton Health and Rehab

Steve Stewart,

I would like to commend you and TCS for an outstanding job at the Ashton Project in McLeansville, NC. We were faced with some difficult weather issues through out the first part of the job, but were able to overcome them with the hard work of you and your staff. Had it not been for the efforts by TCS with the footings and slabs under these conditions, this project could have been very easily been late on delivery. You and your staff was very professional and responded quickly to any and all issues. The “whatever it takes” approach by all of you made a big difference in this project

All of our footings, slabs and walks were well managed and were successful pours. Your assistance in design issues were greatly appreciated as well on this project. Our end result was a very successful and quality concrete job that we turned over to our client. I look forward to working on future projects with you and your staff at TCS.
